First Set of Questions?

Integrated Defense Acquisition, Technology, & Logistics Life Cycle Management Framework

Draft ver. 4.7. May 21, 2004

Three DOD Decision Support Systems Effective Interaction is Essential

The Milestone Decision Authority may authorize entry into the acquisition process at any point, consistent with phase specific entrance criteria and statutory requirements

Concept Refinement Phase — *Refine initial concept. Develop Technology Development Strategy*

Technology Development Phase — *Reduce technology risk and determine appropriate set of technologies to integrate into a full system.*

System Development & Demonstration Phase — *Develop a system or increment of capability; reduce integration and manufacturing risk; ensure operational supportability; reduce logistics footprint; implement human systems integration; design for producibility; ensure affordability and protection of critical program information; and demonstrate system integration, interoperability, safety, and utility.*

Production & Deployment Phase — *Achieve operational capability that satisfies mission needs.*

Operations & Support Phase — *Execute a support program that meets operational support performance requirements and sustains the system in the most cost-effective manner over its total life cycle. Dispose of the system in the most cost-effective manner at the end of its useful life.*

This chart is a classroom aid for Defense Acquisition University students. It provides a notional illustration of the interfaces among the three major decision support systems used to develop, produce, and field a system for national defense. Defense acquisition is a complex process, with many more activities than shown here, and many concurrent processes that cannot be illustrated on a single chart. For more detailed information see the publications on the back of this chart. For more detailed information see the Acquisition, Technology & Logistics Knowledge Sharing System (http://akss.dau.mil).

Decision Points/Milestones: CD | MS A | MS B | DRR | MS C | FRP DR

Low-Rate Initial Production | Full-Rate Production/Deployment | Sustainment | Disposal

Joint Capabilities Integration & Development System (need driven)

ICD | Draft CDD | CDD | CPD | IOC | FOC

Validated and approved CDD and CPD for each increment of an evolutionary acquisition

Functional Area Analysis | Functional Needs Analysis | Functional Solution Analysis | Post Independent Analysis

Joint Concepts | Joint Operating Concepts | Joint Functional Concepts | Joint Integrating Concepts | Integrated Architecture

KPPs | Net-Ready KPP | System Threat Assessment | Service/JROC Validation & Approval | Information Support Plan | I-S Interoperability & Supportability Cert | Threshold/objective tradeoffs - Revised Performance Attributes

Oversight & Review

DAB/ITAB/MD | ADM | Exit Criteria Met | Clinger-Cohen Act - Compliance - Certification | APB | Acquisition Strategy | Business Considerations | AoA | Test & Evaluation Strategy | Increment II | Increment III | Total Life Cycle Systems Management | Post Deployment Performance Review

Contracting

Study Contracts | Acq Plan | Source Selection Plan | Draft RFP | RFP | Technology Development Contract | System Development & Demonstration Contract | LRIP Contract | Production Contract | Post Production Software Support Contracts | Sustainment Contracts

Major Products

Preliminary Integrated Architecture | Best Materiel Approach(es) | Preferred System Concept | Tech Demos | System Performance Spec | Prototypes/ Engineering Dev Models | Initial Production Baseline | Low-Rate Initial Production Systems | Final Production Baseline | Full-Rate Production Systems | In-Service Review | Supports O&M Budget Review

Define Supportability | Evaluate Product | Develop Initial Product Support Strategy | Product Support Plan | Demonstrate Product Support Capability | Product Support Package/PBL Implementation | Product Support/PBL Management | Operations & Sustainment

Initiate Evolutionary Acquisition Strategy

Evolutionary Acquisition Strategy

The Challenge

DoD's Big "A"cquisition Systems and Processes

Technical

Systems Engineering Test & Evaluation Supportability

Environmental Constraints | Needs | Develop Concept Performance & Constraints Definition & Verification Objectives | Assess/Analyze Concept & Verify Performance | Decompose Concept Perf into Functional Definition & Verification Objectives | Assess/Analyze Concept System Versus Functional Capabilities | Decompose Concept Functional Definition into Component Concepts Assessment Objectives | Assess/Analyze Enabling/Critical Components Versus Capabilities | Develop Component Concepts, i.e., Enabling/Critical Technologies, Constraints & Cost/Risk Drivers | Economic Analysis (MAIS Only)

Develop System Perf (& Constraints) Spec & Enabling Critical Tech Identification Plan | Demo/Model Integrated System Versus Performance Spec | Develop Functional Definitions for Enabling Critical Technologies & Associated Verification Plan | Demo System Functionality Versus Plan | Decompose Functional Definitions into Critical Component Definition & Tech Verification Plan | Demo Enabling/ Critical Technology Components Versus Plan | Develop System Concepts, i.e., Enabling/Critical Technologies, Update Constraints & Cost/Risk Drivers | LFT&E (DAB, if appropriate) | POM Funding in FYDP | Economic Analysis | CARD (Designated Programs) | POE | CCA | ICE | Affordability Assessment

Develop System Functional Specs & System Verification Plan | SRR | SFR | FMECA | FTA | RCM | PDR | LORA | MTA | Evolve CI Functional Specs into Product (Build to) Documentation and Inspection Plan | CDR | Fabricate, Assemble, Code to "Build-to" Documentation | Individual CI Verification DT&E | CARD (Designated Programs) | POE | CCA | ICE | Affordability Assessment

Cost Acronyms: CARD - Cost Analysis Requirements Description; CCA - Component Cost Assessment; ICE - Independent Cost Estimate; MAIS - Major Automated Information System; POE - Program Office Estimate; RDT&E - Research, Development, Test & Evaluation

Exit Criteria Met | APB | CPD | SEP | TEMP | Product Baseline | Analyze Deficiencies To Determine Corrective Actions | PCA | Verify Established Production Configuration | FCA | Modify Configuration Hardware/Software/Spec To Correct Deficiencies | Monitor and Collect All Service Use Data | Analyze Data to Determine Root Cause | Determine System Risk/ Hazard Severity | Develop Corrective Action | Assess Risk of Improved System | Implement and Field | Integrate & Test Corrective Action | Process Change - Hardware/ Support Materiel Change | Economic Analysis (MAIS Only) | POE | CCA | ICE | Affordability Assessment

PMO Budget Estimate | PMO POM Input

Cost $ — Cost Estimation Methods: Analogy | Parametric | Engineering | Actual Costs

Types of Funds — RDT&E - Advanced Technology Development | RDT&E - Adv Component Dev & Prototypes | RDT&E - Systems Development & Demonstration | RDT&E - Management & Support | Procurement | Operations & Maintenance

Appropriated Funds To Support Contracts

Planning, Programming, Budgeting, & Execution Process (biennial calendar driven)

On Year | Off Year

Military Departments & Defense Agencies | OSD & Joint Staff | White House

POM/Budget Formulation *PCF/BCP Prep* | August | POM/Budget Submit *PCF/BCP Submit* | September - November | SLRG Reviews | PDM(s) | ISSUES

Joint Planning Documents | National Military Strategy | National Security Strategy | Strategic Planning Guidance *Off Year Optional* | October | Joint Programming Guidance *Off Year Optional* | April / May | Fiscal Guidance | FYDP updated

PBD Cycle | October - November | Final PBDs | November | MBI | December | DoD Budget | OMB | January | President's Budget to Congress | February (1st Monday) | FYDP update to POM

Training, Programming, Budgeting & Execution Acronyms: BCP - Budget Change Proposals; FYDP - Future Years Defense Program; MBI - Major Budget Issues; OMB - Office of Management & Budget; PBD - Program Budget Decision; Program Change Proposals; Program Decision Memorandum; Program Objectives Memorandum; Program Review; Leadership Review Group

DoD Testimony | DoD Appeals | Allocatio | Apportionment

Congress: Budget Committees | Authorization Committees | Appropriation Committees | Authorization/ Appropriation Acts Passed

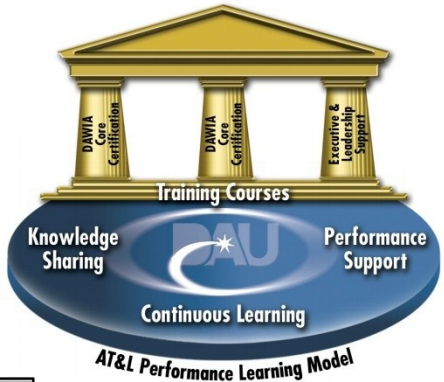
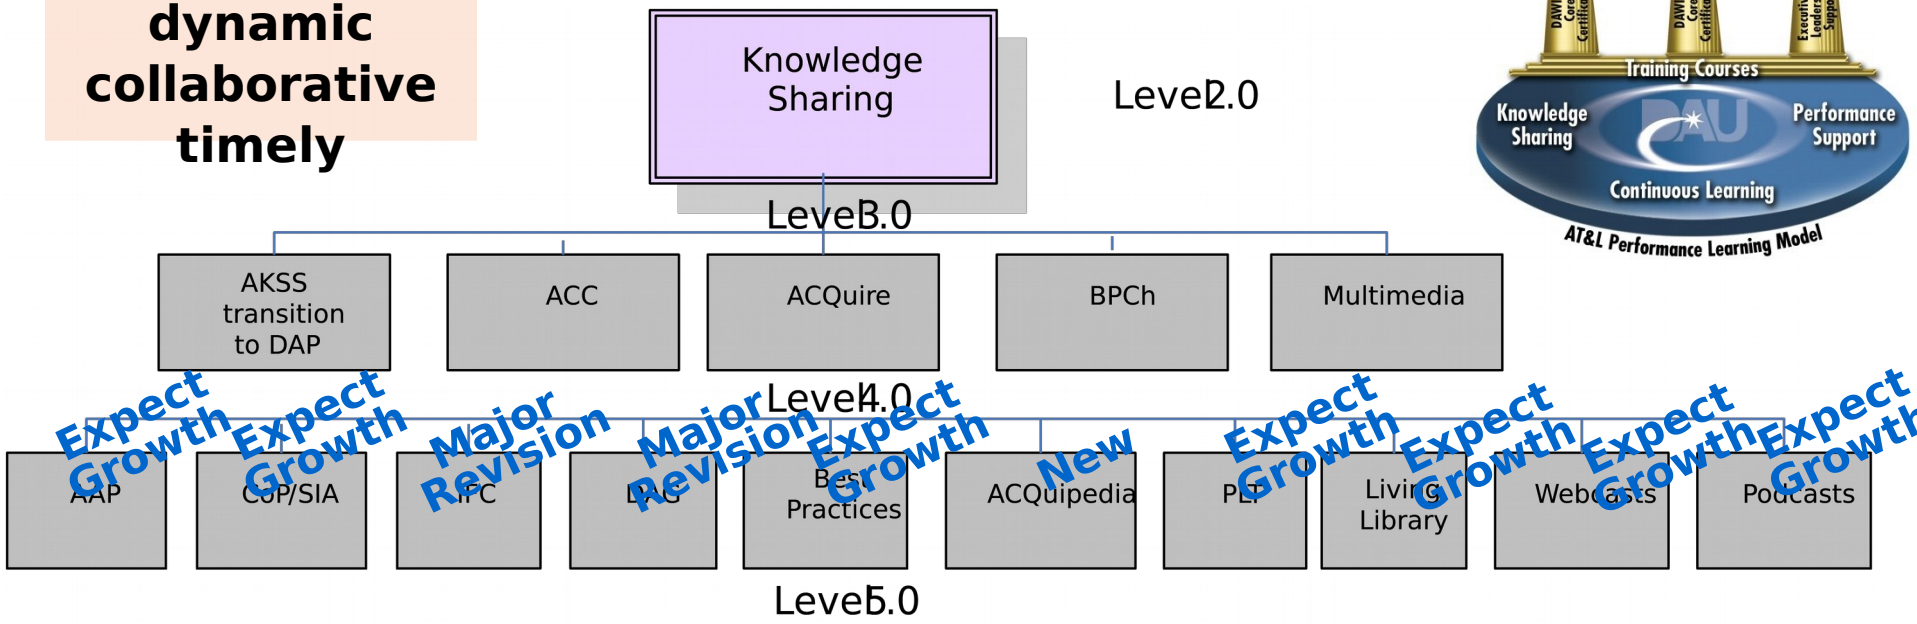
KS Learning Assets

Characteristics
dynamic
collaborative
timely

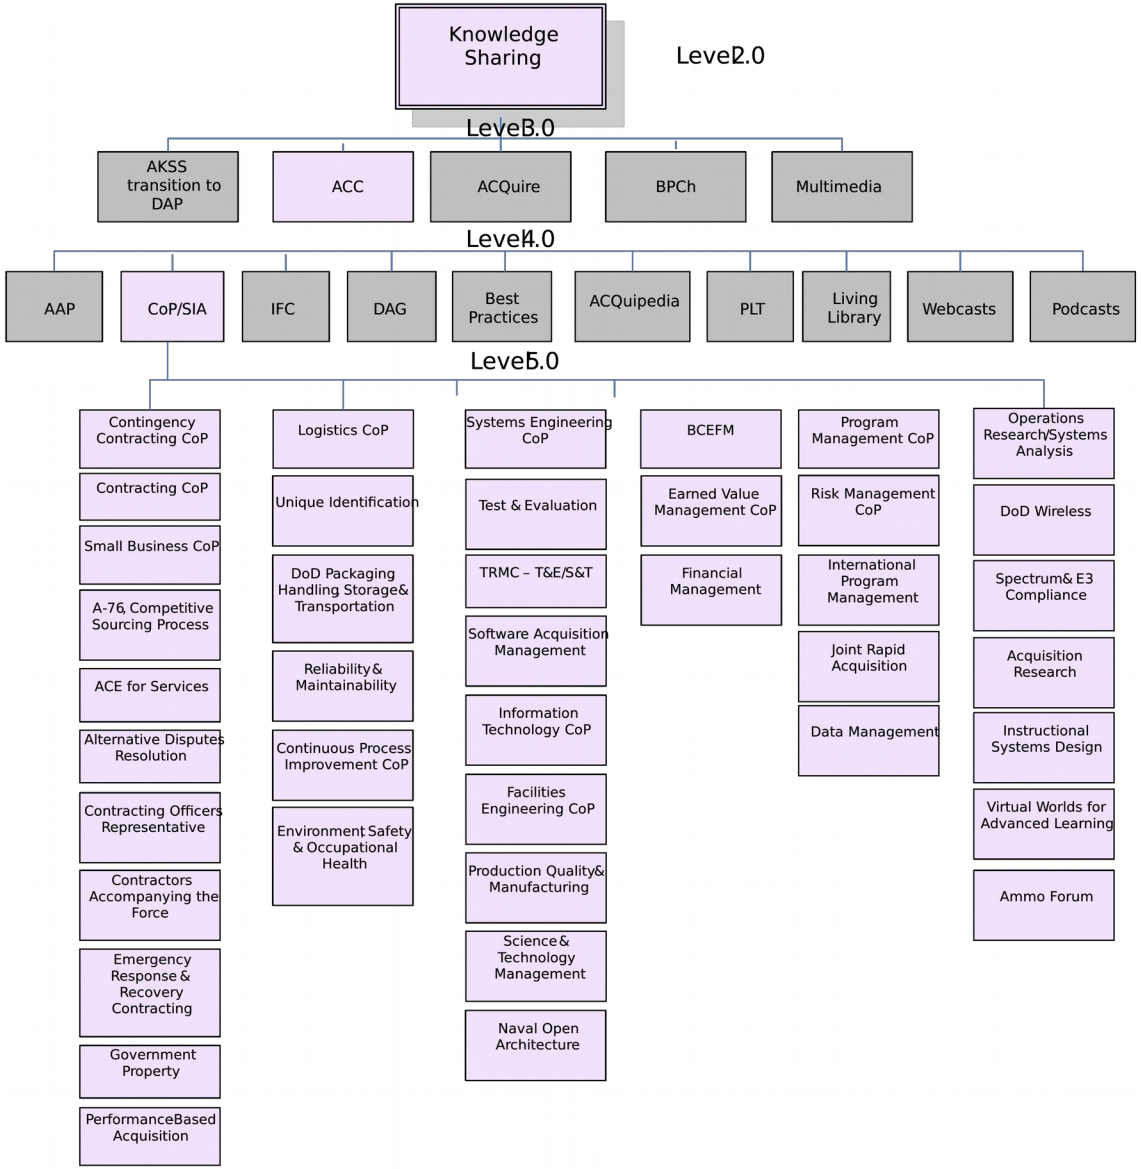




New KS assets emerging & existing assets continue to grow

- **SME support required – develop, maintain, revise**
- **Level of effort – varies by learning asset, ongoing**

KS Learning Assets- ACC



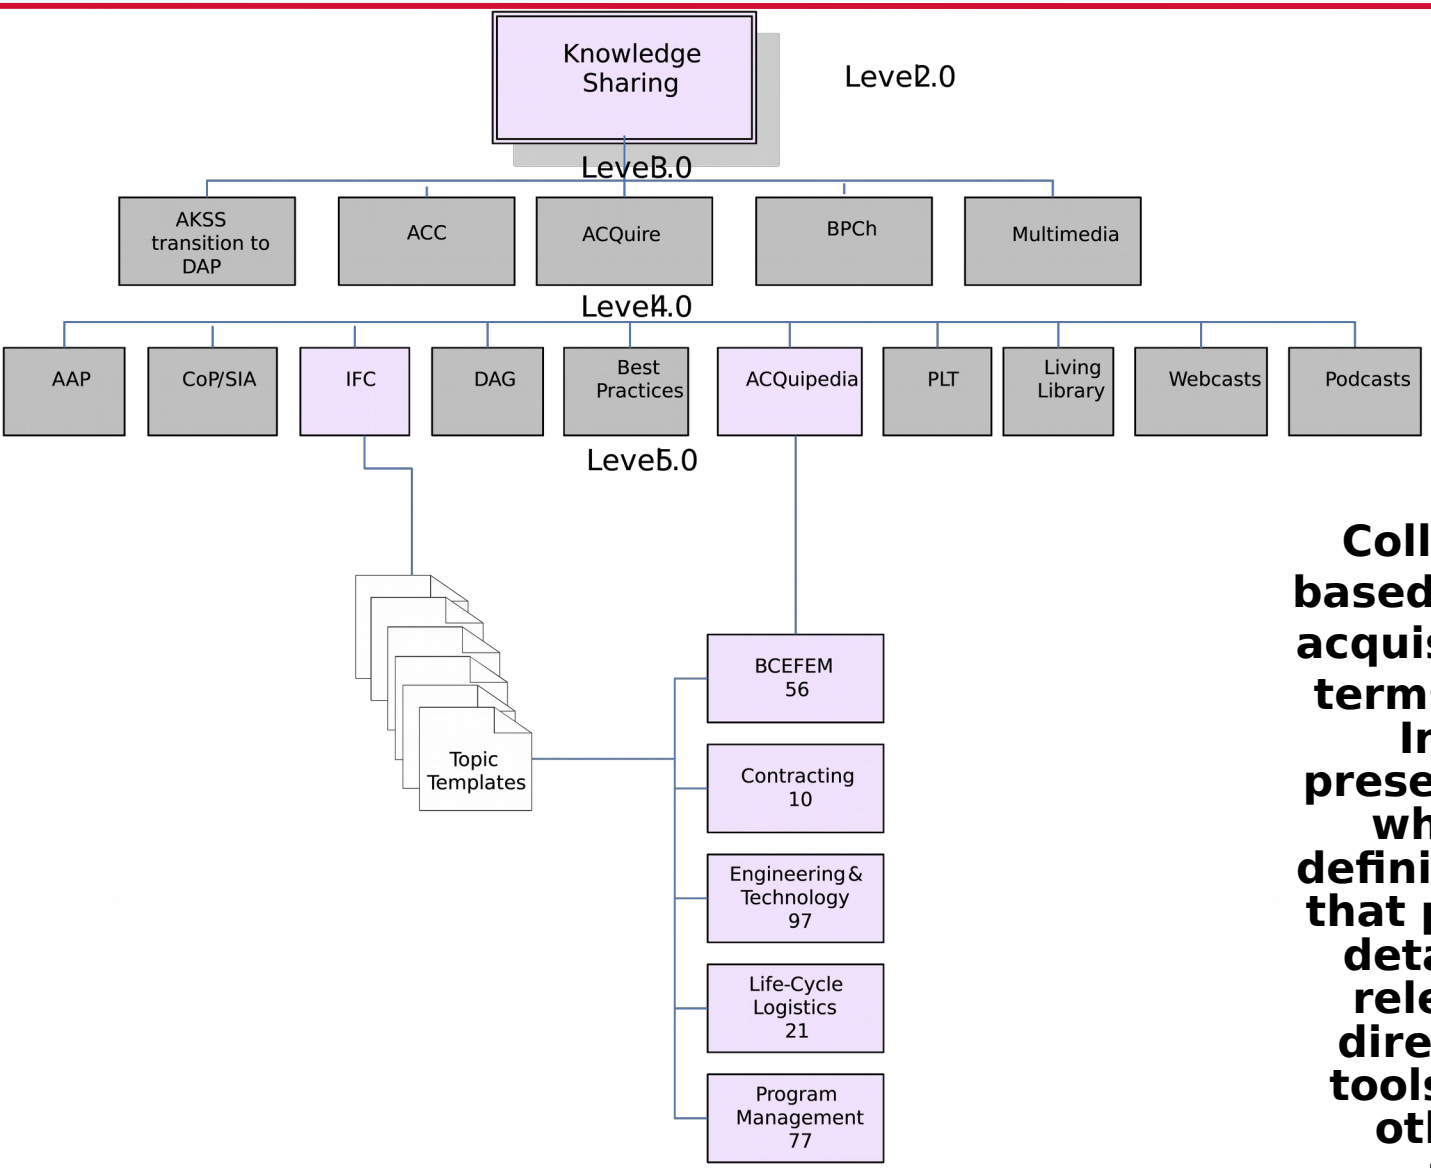
Collaborative web-based communities of practice available 24/7

75K+ registered members

Avg 4M page views/month

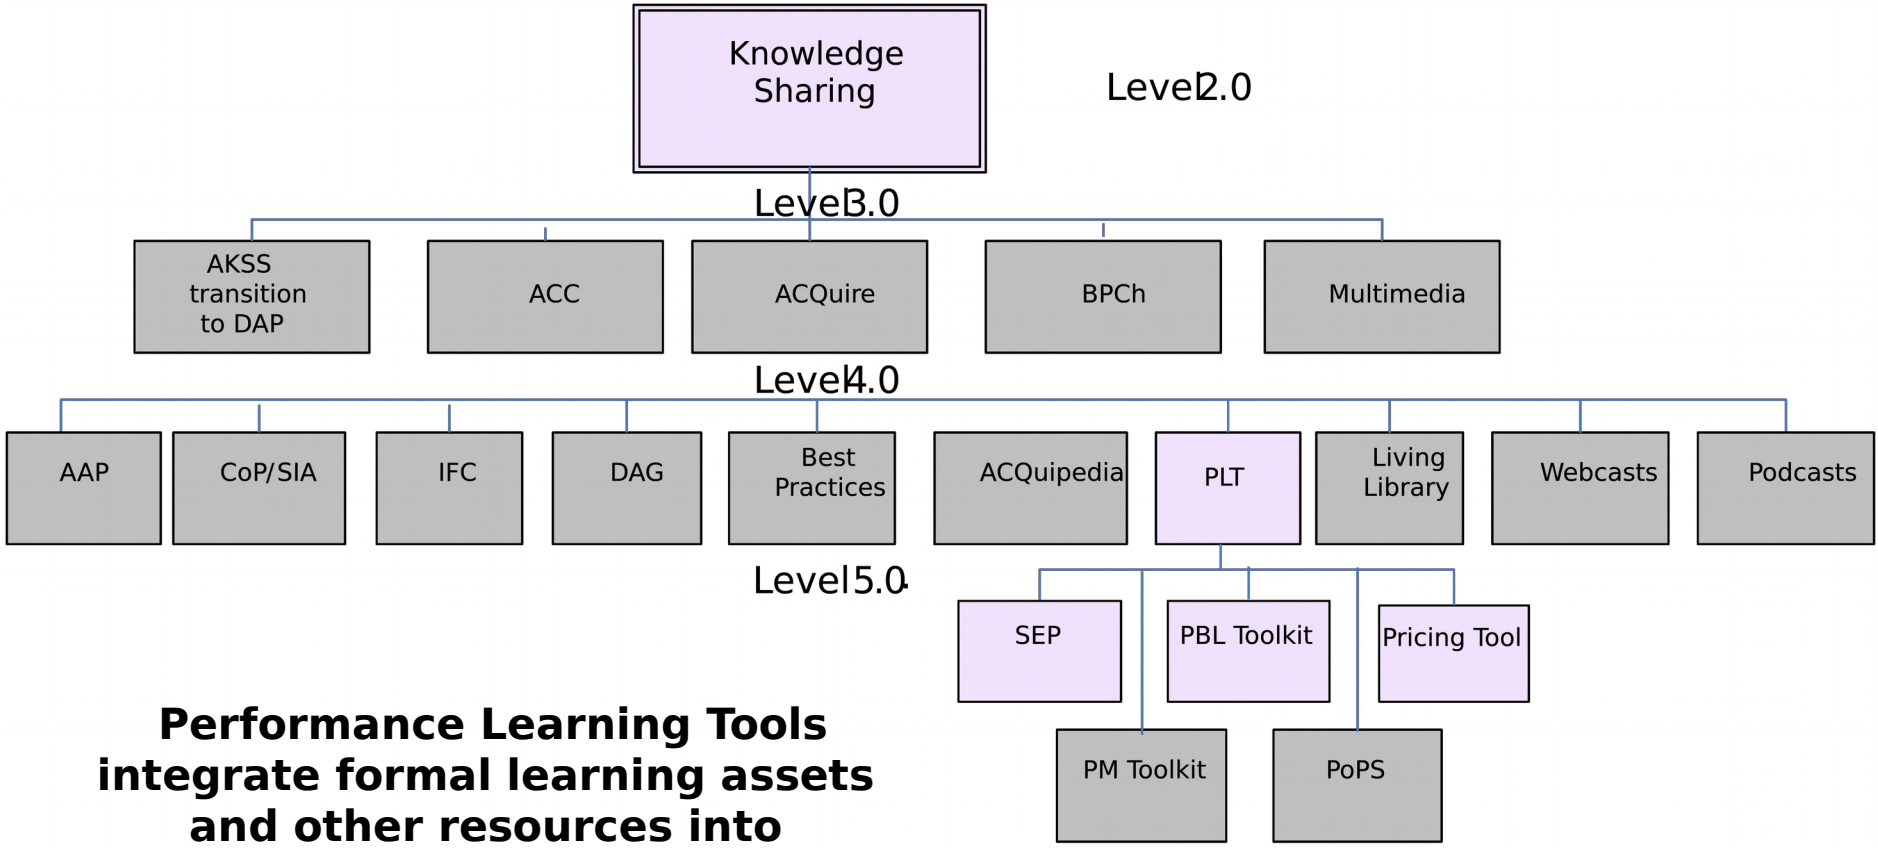
Focused on acquisition topics and community participation in sharing of assets and experiences.

KS Learning Assets - ACQuipedia



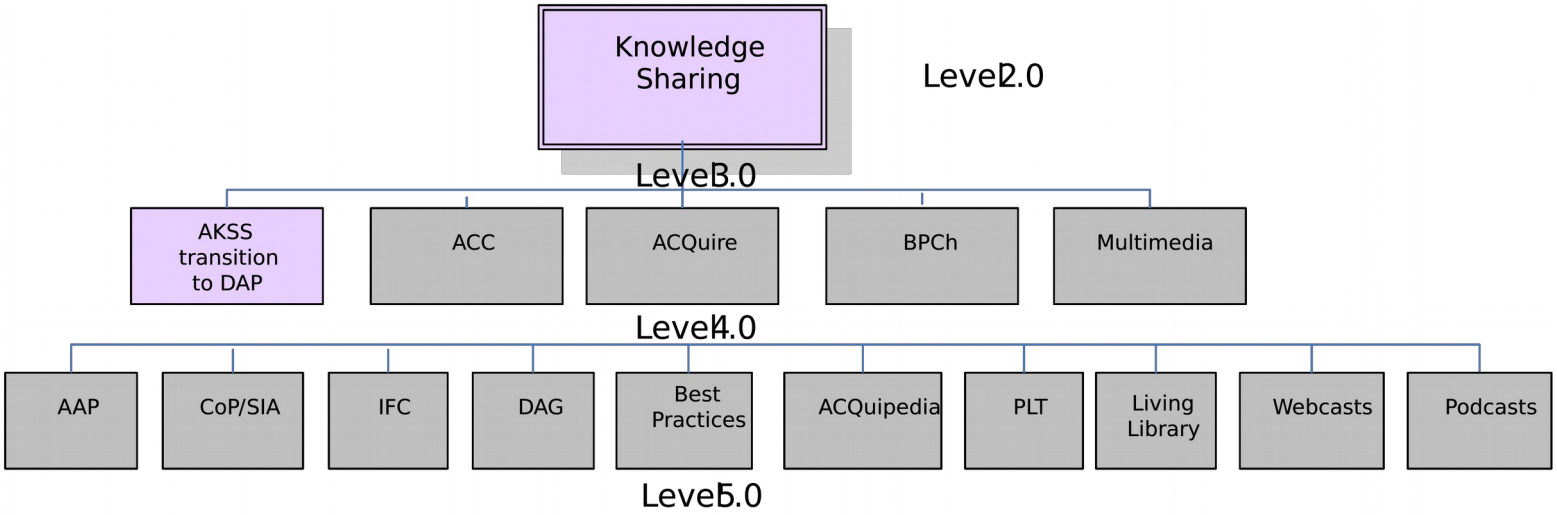
Collaborative web-based encyclopedia of acquisition topics and terms available 24/7
Information is presented in articles, which contain a definition, a narrative that provides further detail and links to relevant policies, directives, guides, tools, training, and other pertinent resources.
Will be highly

KS Learning Assets – Performance Learning Tools (PLT)



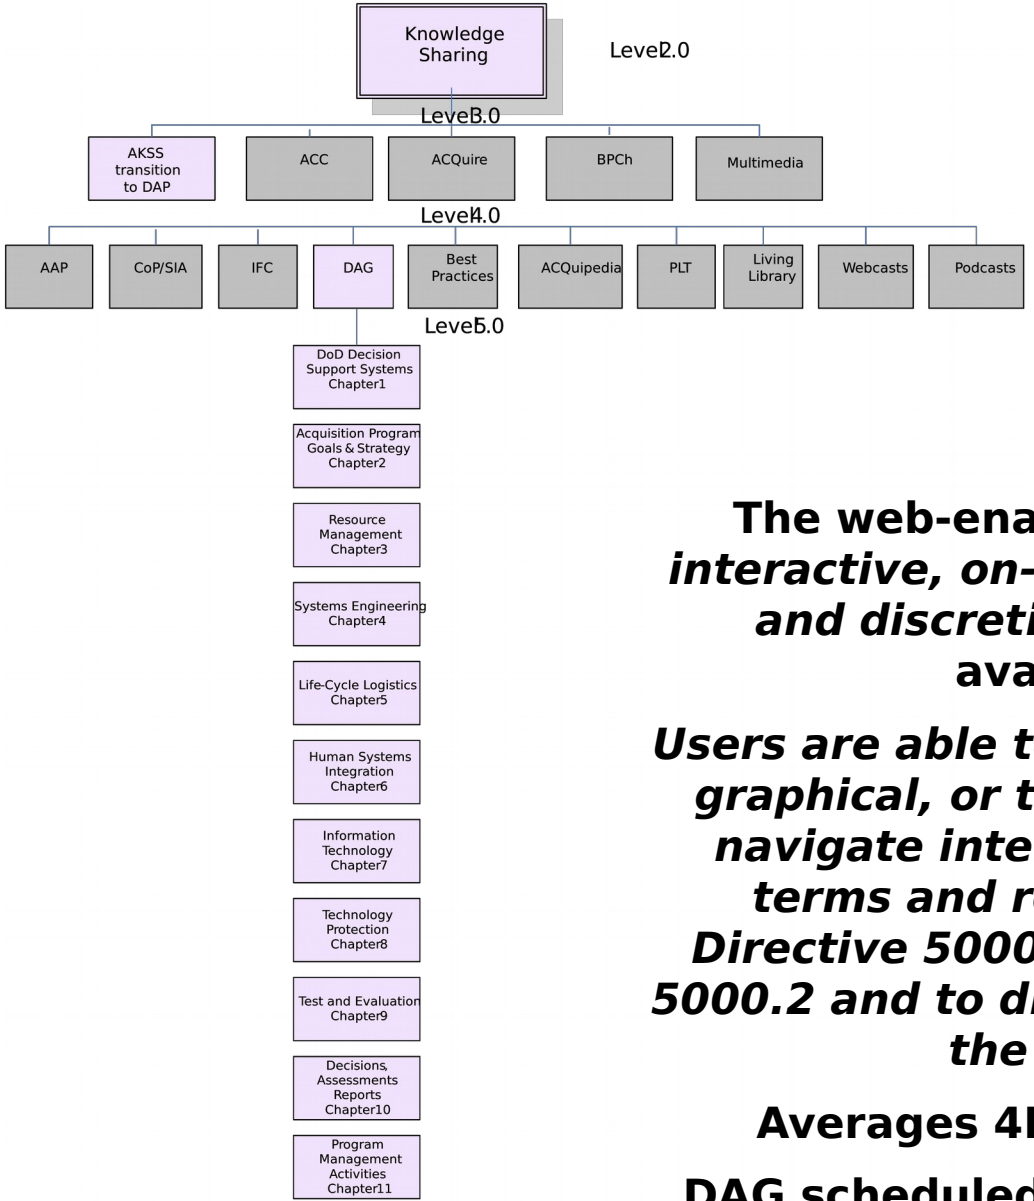
Performance Learning Tools integrate formal learning assets and other resources into comprehensive job performance support tools that support completing a specific task or process.

KS Learning Assets – AKSS / DAP



The DAP focuses on the knowledge content supporting the Big & Little Acquisition Processes, including the functions and forces affecting those processes, in the acquisition of weapon systems & services. The Career Gateways web part focuses on career specific information and services provided by DAU, along with additional information available through additional career specific DoD activities.

KS Learning Assets - DAG



The web-enabled Guidebook is *an interactive, on-line reference to policy and discretionary best practice* available 24/7

Users are able to navigate via an index, graphical, or topical view, as well as navigate interactively through key terms and requirements in DoD Directive 5000.1and DoD Instruction 5000.2 and to discretionary guidance in the Guidebook

Averages 4M page views/month

DAG scheduled to transition to ACC in

Component Acquisition Executive (CAE)

DEFINITION

Secretaries of the Military Departments or Heads of Agencies with the power of redelegation. In the Military Departments, the officials delegated as CAEs (also called Service Acquisition Executives (SAEs)) are respectively, the Assistant Secretary of the Army (Acquisition, Logistics, and Technology) (ASA(AL&T)), the Assistant Secretary of the Navy (Research, Development and Acquisition) (ASN(RD&A)), and the Assistant Secretary of the Air Force (Acquisition) (ASAF(A)). The CAEs are responsible for all acquisition functions within their Components. This includes both the SAEs for the Military Departments and acquisition executives in other DoD Components, such as the U.S. Special Operations Command (USSOCOM) and Defense Logistics Agency (DLA), which also have acquisition management responsibilities

About this page...

This page is the career gateway page for contracting professionals. Here you will

Feature - An Introduction to Contracting

Leonardo Manning
Contracting Director

Contracting with the U.S. Government is based on many of the same principles as commercial contracting and can be very profitable, but is sufficiently different from commercial contracting to require special care. Persons entering into commercial contracts are pretty much free to do anything that they can agree on. Each represents their own interests and can obligate themselves in any way they believe will benefit them. If one or both persons are represented by agents, usually employees, commercial contracting law allows the agent to form contracts based on generally accepted notions of commercial reasonableness. In essence, the law allows each side to rely on the other's authority to make a binding contract. Of course there are many nuances and cases covering this, but generally speaking the law favors the creation of commercial contracts in order to facilitate business.

ACC Practice Center Version 2.0

The significant policy revisions associated with the re-issuance of DoD Instruction 5000.02 in December 2008 prompted a complete review and revision of the DAG content. The revised DAG with all the current functionality, and more (including implementation guidance resulting from the Weapon System Acquisition Reform Act of 2009), will be completed and on-line several months from now. While that task is being completed, this site provides an *Interim* DAG with the same business practice and policy content as the final, but with fewer internal and external navigation options. The objective: To provide you with the information you need to manage your programs while we make the DAG more user friendly. We hope you find the *Interim* Guidebook a useful resource and look forward to your feedback.

Summary and Conclusions

Developing New Systems and Tools Is Great, But Content Is Still King

The Good News Is – Content Is Exploding

But The Bad News Is – It's Exploding

This Is Our Biggest KM Issue

But There's Hopefully More Good News - Breadth, depth, currency, and accuracy of "content" can be maintained through mass collaboration of "trusted" users
